

SAFE2STAY

SAFE2STAY is a total release 150ml aerosol which releases a fog in the space it's placed, killing 99.99% of viruses, bacteria and mould. It is an alcohol-based solution with additional biocides.

INSTRUCTIONS FOR USE – VEHICLES

1. Ensure the vehicle is clear from people, children and pets.
2. Close all windows and start engine.
3. Switch air-conditioning on/recycling to full power and lowest temperature.
4. Remove the can cap and place the can in the rear footwell or cup holder.
5. Press and lock the total release valve, ensuring can is left upright.
6. Leave the vehicle and close door.
7. Once the can has emptied, allow the air-conditioning to run for a further 15-20 minutes.
8. Turn off the engine and ventilate the vehicle by opening the windows.
9. You're now Safe2Stay - Enjoy your sanitised vehicle.
